PART I

CHAPTER III

STATISTICS OF HIGHER EDUCATION, 1931-32

Prepared by EMERY M. FOSTER, Chief, Division of Statistics, HENRY G. BADGER, assistant statistician; FREDERICK J. KELLY, Chief, Division of Higher Education, and WALTER J. GREENLEAF, specialist in higher education, assisted by MARGARET J. S. CARR, NATHALIE LEVEQUE, BLANCHE K. CHOATE, and MAUDE FARR, statistical clerks

PART I. GENERAL FINDINGS AND INTERPRETATIONS

HIGHER EDUCATION AND THE DEPRESSION

Colleges and universities feel the full force of economic depressions later than do business and industry. The close of the year ending June 30, 1932, found business in almost complete stagnation, and unemployment at about its worst. Colleges and universities for the year ending the same time, collected in student fees 6½ million dollars more than they did 2 years earlier. To be sure, this gain in fees was a little more than offset by a decrease of 7½ million dollars in income from endowments. A depression registers its blighting effect upon endowments quickly, while students can draw upon reserves for fees a while longer.

Even the income from public sources held up for the year ending June 30, 1932, to 3 million more than 2 years earlier. Probably this was due in part to the fact that the appropriations were made either during the spring of 1931 or earlier, and it will be recalled that even though the depression had lasted over a year at that time, the people were unwilling to believe that it was to be as severe or as prolonged as it has proved to be. The legislative bodies, eager to maintain first-class colleges and universities, made increased appropriations for maintenance, even though public income was already showing clear signs of dwindling.

(The comparisons in the above two paragraphs are based upon differing numbers of institutions for the 2 years covered, as shown in table 3. The discrepancies thus produced are not serious, however, because the institutions not included in the 1929-30 totals have relatively small items of income.)

This phenomenon of lag which characterizes the entrance of educational institutions into the depression may well forecast a lag, likewise, in emerging from the depression. In fact, the experience of educational institutions in past depressions lends weight to the expectation that the worst years for the colleges will come a year or two after the worst of the depression has passed in business and industry. Indeed there is ample and sorry evidence at this writing that when we

come to tell the story of higher education's finances for the year 1934, the account will show greatly reduced income, the cutting in half of the salaries in many institutions, and inability to pay even the reduced amounts.

THE DUAL SYSTEM OF CONTROL OF HIGHER EDUCATION

The drop in income from endowment at the same time that student fees and income from public sources increases, reminds us that higher education is maintained in this country under a dual system of control. Let us examine a few figures bearing upon this dual control.

If the junior colleges and the teachers colleges and normal schools are omitted from the computations, we find that 140 publicly controlled and 671 privately controlled colleges and universities submitted financial reports, and 134 publicly controlled and 695 privately controlled institutions submitted enrollment and faculty reports. Disregarding these discrepancies in the numbers of institutions reporting we get the following picture of the two parts of our dual system. The number of institutions is about 5 to 1 in favor of the privately controlled institutions. In the regular session, the publicly controlled institutions enrolled 366,000 and the privately controlled 538,000 students, a ratio of almost exactly 2 to 3. The publicly controlled institutions provide for 40 percent of the students and the privately controlled ones, 60 percent.

Turning to the income figures we find that the publicly controlled institutions received 123 million from public sources. The privately controlled ones received 57 million from endowment sources. Of course, not all the public funds are used for instruction purposes. Neither is all the endowment income so used. Nevertheless, this is a wide difference which must be made up largely by higher student fees in the privately controlled institutions.

This question of student fees for the support of higher education is naturally made more acute by the depression. Students and parents have insufficient funds to meet high tuition rates. They offer notes in lieu of currency for their fees. Institutions therefore suffer from greatly reduced income, and their very existence seems jeopardized in many cases. The privately controlled institutions received 109 million dollars from student fees in 1931-32, and the publicly controlled ones received 28 million. This is a ratio of nearly 4 to 1. This is the way the difference is largely made up between public support of publicly controlled institutions and endowment support of privately controlled ones. Of course certain other figures are necessary if the entire income is to be considered, but these are not essential for our purpose here.

By comparing the foregoing figures with figures for 10 years ago, some significant trends can be discerned. (Here as in the foregoing

figures, junior colleges and teachers colleges are omitted.) The following percentage of increases from 1921-22 to 1931-32 are significant:

	Percent
Increase in income from student fees, privately controlled institutions.....	115
Increase in income from student fees, publicly controlled institutions.....	104
Increase in income for current expenses from public sources, publicly controlled institutions.....	63
Increase in income for current expenses from productive or endowment funds, privately controlled institutions.....	86

These four increases should now be examined in the light of the relative enrollments in the two types of institutions at the beginning and at the end of the 10-year period.

	Percent
Of all college students, the percent enrolled in publicly controlled institutions in 1921-22.....	35.7
Of all college students, the percent enrolled in publicly controlled institutions in 1931-32.....	40.5

From this it will be observed that the percentage enrolled in publicly controlled institutions increased in 10 years from 35.7 to 40.5, or 4.8 points. The percentage enrolled in privately controlled institutions decreased a like number of points. While this decided drift to publicly controlled institutions was going on in enrollment of students, the increase in public funds to publicly controlled institutions for the decade was only 63 percent, whereas the increase in income from endowment to privately controlled institutions was 86 percent. This, too, in spite of the fact that income from endowment decreased 10 percent during the biennium 1930-32, while the receipts from public sources increased more than 4 percent. If, therefore, the calculation had been made for data 2 years earlier, an even greater difference in the growth of the two sources of support would have been revealed.

The above figures bearing upon the comparative support of the two types of higher education in this country are here presented in order to emphasize one point. The public has apparently not formulated any clear policy with respect to the public's responsibility for the support of higher education. Even in the publicly controlled institutions the income from student fees increased 104 percent in 10 years while the income from public sources increased but 63 percent. Does this mean that publicly controlled education at public expense is to terminate with the high school, or lower? Or does the more rapid increase of income from endowments than from public sources mean that the conviction is growing in the minds of philanthropically minded people of wealth that higher education ought to be dominantly in the hands of privately controlled institutions?

A matter of such importance merits more careful consideration on the part of our statesmen, both political and educational, than it appears to be receiving.

NUMBER OF STUDENTS IN RELATION TO TOTAL POPULATION

One hears the comment often these days that there are too many young people going to college. There is of course no way to determine how many should go to college, but it may be useful to point out certain facts that bear upon it.

The total enrollment of resident students during the regular 9-months session in all the 1,460 institutions reporting was 1,154,117. This number is just about half as large as the number of young people 18 years old in this country. In other words, if all the 18-year-old youth were to enter college, they alone would fill all the colleges twice over. On the average, only about one-tenth of the young people of college age are in college.

Is this too many?

Comparisons are frequently made with university enrollments in Europe. Such comparisons are usually very misleading. Students in most European countries have completed the equivalent of our freshman college year—and in many cases the sophomore year also—before entering the universities. Furthermore, European figures do not usually include students in normal schools and technological institutions. When comparisons are made with enrollments in the classes above the sophomore, and omitting normal schools, our proportion of students while still nearly twice that of Europe, is not so fantastic as usually reported.

Liberal estimated, the number of students above sophomore year in degree-granting institutions in this country (calculated at 45 percent of the total) is 450,000. This means about 1 student for each 275 of the total population. Comparable figures for certain European countries are:¹ Germany, 504; Sweden, 563; France, 574; Norway, 583; Holland, 672; Italy, 867.

But should this differential be interpreted as meaning that we are educating too many? Our curricula and those of Europe are organized so differently that only very general comparisons can be made. Certain it is, however, that we have many more engineering students and business administration students than have European universities. Perhaps our social life calls for more. In proportion to population we have more automobiles, more heavy farm machinery, more mechanical equipment in our homes, more people engaged in complicated business organizations, etc. In short, our needs for professionally trained engineers and business men are probably much greater than are the similar needs in most European countries.

Probably other professions would exhibit similar differences if they were analyzed. At any rate, the need for trained men and women bears a direct relationship to the social life of the people, and it is

¹ Numbers of students taken from: Rapport de la Conférence D'Experts sur le surpeuplement des Universités, Geneva, August 1923, p. 24. Population figures taken from World Almanac, 1924.

unsafe to assume that the correct ratio of college and university students to total population in one country is the correct ratio in another. The real criterion is not to be found in comparisons with other countries. The above figures are given mostly to refute the oft-repeated assertions that we have five times as many students in college as have European countries.

Statistics may be used to shed light upon many educational questions only three of which have been briefly discussed above. In the interest of the busy reader it is advantageous also to draw out of statistical tables certain important figures, to make comparisons between related items, and to reveal trends. The following pages have been prepared for that purpose.

First a word about the data themselves.

ASSEMBLING OF THE DATA

Statistics of higher education have been collected and published by the Office of Education since 1870. These reports, originally on an annual basis, have been published biennially beginning with 1918. Earlier reports attempted segregation of institutions by type of curricular offering, with the result that an occasional institution was carried on more than one list and a grand total exclusive of duplications was almost impossible. In later years these various lists have been merged one by one with the general list, although up to 1930 separate textual discussions of various types of colleges continued to appear in publications of this Office.

In the present report, for the first time, statistics of all institutions of higher education, including junior colleges, are here summarized in one publication. This includes material previously carried in three separate chapters: (1) On universities, colleges, and professional schools; (2) on teachers colleges and normal schools; and (3) on land-grant colleges and universities. A unified statistical view of the higher educational situation in the United States is thus afforded.

A total of 1,460 institutions are reported, including universities, colleges, professional schools of various types including teachers colleges and normal schools, and junior colleges offering at least 2 years of work above the secondary level and enrolling at least 50 college students. The figures presented were obtained by means of printed questionnaires, copies of which were sent to every institution of college grade in continental United States of whose existence the Office of Education had information. Approximately 20 percent of the institutions were visited by representatives of the Office, who assisted in making the returns. Questionnaires were also sent to and replies received from institutions of college grade in the outlying parts of the United States, but these institutions are not included in the general summaries.

DISTRIBUTION OF INSTITUTIONS

The number of institutions of various types in the different States is shown in the accompanying table A.

TABLE A.—NUMBER OF INSTITUTIONS REPORTING PERSONNEL DATA

State	Universities, colleges, and professional schools				Teacher-training institutions				Total
	Publicly controlled		Privately controlled		Publicly controlled		Privately controlled

West Virginia.....	2	1	6	1	7				17
Wisconsin.....	1		15	2	10	16			44
Wyoming.....	1								1
United States.....	134	159	585	183	145	105	10	25	1,460
1933-39.....	117	129	584	148	134	139	6	53	1,460

Here it will be noted that 6 States report 60 or more institutions each, while at the other end of the scale 13 States report not more than 10 institutions each.

The total of 1,460 institutions carried in 1931-32 is 51 more than the number reporting for 1929-30. This increase is due in part to an increase in the number of institutions supplying data requested by the Office of Education. It is also due partially to the opening of new schools, principally those of the junior college type.

The very noticeable decrease in teachers colleges and normal schools is due to two factors: (1) The actual closing of a number of normal schools, and (2) the transfer of several institutions from the list of teachers colleges and normal schools to that of universities, colleges, and professional schools.

Worthy of special comment is the increase in number of junior colleges reporting. In 1930 reports were received from 129 publicly controlled and 148 privately controlled institutions of this type, a total of 277 institutions. In 1932 reports were received from 157 publicly controlled and 183 privately controlled, or a total of 340 junior colleges. The increase from 1930 to 1932 is 63.

There were in 1932 but 5 States (in addition to the District of Columbia) from which no junior college reports were received: Maine, Nevada, Rhode Island, Vermont, and Wyoming.

DISTRIBUTION OF PROFESSIONAL SCHOOLS

Many of the 1,460 institutions reporting maintain professional schools or departments as a part of their organization. Considering each of these as well as the separate independent schools, there were in 1932 a total of 1,350 professional schools. The distribution of these professional schools is shown in the accompanying table B. Professional courses in colleges of liberal arts are not included in this tabulation.

TABLE B.—DISTRIBUTION OF 1,350 DEGREE-GRANTING PROFESSIONAL SCHOOLS, 1931-32

¹ Includes teachers colleges but not normal schools.

² Detail given in table 2.

LIMITATIONS OF THE DATA

There are two limitations of the data here presented. First, the authorities of certain institutions furnish only incomplete data; second, there is some lack of uniformity in the interpretations placed by different schools on the items contained in the questionnaires.

For the completeness and accuracy of the data here presented the Office of Education depends almost wholly on the voluntary cooperation of the authorities of the various institutions of higher education over the country. Of the 1,460 institutions, only the land-grant colleges and universities are under any legal obligation to report to this Office.

STEPS TOWARD STANDARD REPORTS

In the field of higher educational finance, while there is not yet complete agreement as to the meaning or relative importance of the items on which information should be collected, great strides have been made in that direction in recent years. Probably the greatest single contribution in this field is that made by the National Committee on Standard Reports for Institutions of Higher Education. The recommendations of this committee have been adopted in general by some of the regional accrediting agencies and denominational boards of higher education. There is an ever-widening acceptance of its major recommendations among institutions over the country. The methods suggested by it have been followed in principle by this Office and form the basis of the financial data here presented.

A study which is closely related to the work of the national committee was made by Aziero.² This study deals with some of the difficulties encountered in attempting to standardize financial procedure in institutions sponsored by the Roman Catholic Church and suggests certain basic principles and accounting procedure looking toward comparability between Catholic and non-Catholic institutions. Attention is given in it to the financial evaluation of non-salaried service, joint use of properties by two or more corporate units, and classification of accounts in general.

*COMPARATIVE SUMMARY, FACULTY, STUDENTS, AND DEGREES,
1900-32*

Table 1, page 25 gives an historical summary of certain items relating to staff, students, degrees, and other items of general interest for institutions of higher education from 1899-1900 to 1931-32.

Part 1 of this table is a continuation of the summary table which formerly introduced the statistics of universities, colleges, and professional schools.

² Aziero, Charles. Accounting for Catholic Institutions of Higher Education. National Benedictine Educational Association Bulletin, 16: 29-57, December 1933.

Part 2 continues the summary hitherto carried in the chapter on teachers colleges and normal schools.

Because of the changes in the forms used for collecting data in 1931-32 from those formerly used, the trends which appear must be interpreted with caution. Because of these differences, the data carried in the two parts of this table should be studied in connection with those presented in table 2 (staff, students, and degrees, 1931-32).

FACULTY, STUDENTS, AND DEGREES, SUMMARY, 1931-32

Table 2, page 28, gives a general summary of staff, resident students of college grade, and degrees conferred, at institutions of higher education during the year 1931-32. The institutions are also classified according to type of control, curricular offering, and whether they grant degrees or not.

From this general summary table a few observations of special interest may be made.

FACULTY OR TEACHING STAFF

The 1,460 institutions in the country required the equivalent of more than 100,000 full-time staff members, including administrative officers, teachers, extension and research workers, and other professional employees, but not including clerical or custodial employees.

Comparison should not be attempted between this figure and any figure for previous years for the reason that 1931-32 was the first year for which information concerning full-time equivalence was collected.

A percentage analysis, by sex, of the staff members of the different types of institutions follows:

TABLE C.—PERCENTAGE ANALYSIS OF TEACHING STAFF, 1931-32, BY TYPE OF SCHOOL AND BY SEX

Item	Universities, colleges, and professional schools			Teachers colleges and normal schools			All institutions reporting		
	Public	Private	All	Public	Private	All	Public	Private	All
1	2	3	4	5	6	7	8	9	10
Degree-granting:									
Men.....	32.0	45.2	77.2	40.7	2.5	43.2	32.9	41.0	73.9
Women.....	9.8	3.10	22.8	54.6	2.2	56.8	14.2	11.9	26.1
Total.....	41.8	58.2	100.0 (82,749)	95.3	4.7	100.0 (9,066)	47.1	52.9	100.0 (91,814)
Non-degree-granting:									
Men.....	37.9	22.8	50.7	19.8	3.9	23.7	25.6	17.4	43.0
Women.....	20.2	29.1	49.3	65.1	11.2	76.3	33.0	24.0	57.0
Total.....	48.1	51.9	100.0 (6,435)	84.9	15.1	100.0 (2,540)	58.6	41.4	100.0 (8,975)
All institutions:									
Men.....	31.7	43.6	75.3	36.1	2.8	38.9	32.2	38.9	71.1
Women.....	10.5	14.2	24.7	56.9	4.2	61.1	15.9	13.0	28.9
Total.....	42.2	57.8	100.0 (89,184)	93.0	7.0	100.0 (11,606)	48.1	51.9	100.0 (100,790)

Resident instruction as distinguished from extension instruction and research claimed the services of 65,828 men and 24,247 women, or 90,075 persons in all, in 1931-32. (These figures are not reduced to a full-time basis.) These included 79,314 persons thus employed in the university, college, and professional school group and 10,761 in the teacher-training school group. Of the total number reported, 88,172 were in work of collegiate grade and 2,957 in secondary instruction; 1,054 instructors (all but 7 of whom were in the university, college, and professional school group) divided their time between secondary and collegiate work and are listed in both categories.

The following tabulation shows the increase in total number since 1921-22.

TABLE D.—RESIDENT INSTRUCTIONAL STAFF (ABOVE SECONDARY GRADE), 1921-22 TO 1931-32

Year	Number	Increase over previous report		Year	Number	Increase over previous report	
		Number	Percent			Number	Percent
1	2	3	4	1	2	3	4
1921-22.....	55,486			1927-28.....	76,080	5,406	7.6
1923-24.....	63,999	7,513	11.5	1929-30.....	82,386	6,306	8.3
1925-26.....	70,674	6,675	10.4	1931-32.....	88,172	5,786	7.0

The following items relating to staff engaged in special work are presented for the first time in National and State summaries. The significance of these services is suggested by the national totals: Summer session 1931, 26,139; correspondence work, 3,896; extension class and course instruction, 5,105; agricultural and home economics extension, 2,032; county, home, and club agents, 4,046; agricultural and experiment station staff, 2,924; other research workers, 1,449. (See table 7, p. 59.)

STUDENTS

Institutions of higher education enrolled a total of more than 1,100,000 resident students of above secondary grade during the regular session from September 1931, to June 1932, and more than 414,000 for the summer session of 1931.

More than 530,000 were listed as undergraduates in arts and sciences and more than 42,000 as graduates in arts and sciences. Professional schools enrolled nearly half a million undergraduates and more than 35,000 graduates.

The total enrollment has increased continuously. The rate of increase is shown in the following tabulation:

TABLE E.—RESIDENT COLLEGE ENROLLMENTS IN ALL INSTITUTIONS OF HIGHER EDUCATION, 1919-20 TO 1931-32, SUMMER SESSIONS EXCLUDED.

Year	Enrollment	Percent of increase in 2 years	Year	Enrollment	Percent of increase in 2 years
1919-20	597,857		1927-28	1,053,955	14.9
1921-22	681,076	13.9	1929-30	1,100,737	4.4
1923-24	823,063	20.8	1931-32	1,154,117	4.9
1925-26	917,462	11.5			

Four of every seven resident college students are men. The percentage of men goes higher in the university, college, and professional school group, reaching its maximum of 63.1 percent in the degree-granting institutions of this type. Among the teacher-training institutions the reverse is true, women outnumbering men 2 to 1 in teachers colleges and nearly 5 to 1 in normal schools.

These and similar facts may be noted in the accompanying percentage analysis, of resident college students, by sex.

TABLE F.—PERCENTAGE ANALYSIS OF RESIDENT COLLEGE STUDENTS, BY TYPE AND CONTROL OF INSTITUTION AND BY SEX, 1931-32

Item	Universities, colleges, and professional schools			Teachers colleges and normal schools			All institutions reporting		
	Public	Private	All	Public	Private	All	Public	Private	All
1	2	3	4	5	6	7	8	9	10
Degree-granting:									
Men	25.4	37.7	63.1	32.2	1.0	33.2	28.3	32.9	59.2
Women	15.1	21.8	36.9	64.7	2.1	66.8	21.7	19.1	40.8
Total	40.5	59.5	100.0 (904, 694)	96.9	3.1	100.0 (138, 254)	48.0	52.0	100.0 (1, 042, 948)
Non-degree-granting:									
Men	39.5	14.1	53.6	15.6	1.4	17.0	33.9	11.1	45.0
Women	29.7	16.7	46.4	72.4	10.6	83.0	39.8	15.2	55.0
Total	69.2	30.8	100.0 (85, 063)	88.0	12.0	100.0 (26, 106)	73.7	26.3	100.0 (111, 169)
All institutions:									
Men	26.6	25.7	62.3	29.6	1.0	30.6	27.0	30.8	57.8
Women	16.4	21.3	37.7	65.9	3.5	69.4	23.4	18.8	42.2
Total	43.0	47.0	100.0 (989, 757)	95.5	4.5	100.0 (164, 360)	50.4	49.6	100.0 (1, 154, 117)

The enrollment figures so far given do not include the following students of less than college grade enrolled at institutions of collegiate rank in 1931-32: 20,891 men and 16,087 women in elementary and secondary grades; 14,581 men and 5,692 women in correspondence courses; and 86,430 men and 68,218 women in extension courses.

DEGREES

The baccalaureate or the first degree in professional work was conferred on more than 136,000 persons during the year under review; the master's (or an advanced degree in engineering) was conferred on more than 19,000; and 2,900 persons were admitted to the doctorate *in cursu*.

Tables 10 and 13 show 14,671 students in colleges of agriculture, with degrees conferred on 2,748. This compares with 2,333 degrees in agriculture conferred in 1930. Neither of these figures, however, includes graduates in arts and sciences with specialization in agriculture. The number of such persons in 1932 was 288; no data on this point were collected for 1929-30.

In professional schools of commerce and business there were enrolled 64,274 students, 7,293 degrees being awarded. The number of degrees conferred in this field in 1930 was 6,741, including 528 degrees of M.B.A. In 1932, in addition to the above, the number of degrees in arts and sciences with major in commerce and business was 3,417.

In dentistry 8,519 students were enrolled, 2,084 degrees being conferred, not including 166 granted to persons in pre dental courses in arts and sciences.

In engineering, 77,041 students and 12,004 degrees are reported.

The number of students and degrees in professional schools of home economics, law, medicine, nursing, pharmacy, theology, and other fields are shown in the tables. The number of graduates in arts and sciences with specialization in such of these fields as were reported are shown in table 10.

The total number of honorary degrees reported in 1931-32 was 1,167. In 1929-30 it was 1,347; in 1927-28 it was 1,245; and in 1925-26 it was 1,214. These figures cover only the university, college, and professional school group, as data on this point have not been collected from teachers colleges.

All but 146 of the honorary degrees conferred in 1931-32 were reported by institutions under private control.

As usual, the doctorate was in 1931-32 by far the most popular honorary degree, 1,062, or 91 percent of the total, being of this grade. Twenty-five different types of doctorate were conferred, but, as usual, the 4 most popular degrees were the LL.D., the D.D., the Sc.D., and the Litt.D., this order of popularity being the same for both 1929-30 and 1931-32.

Thirteen varieties of honorary master's degrees were conferred on 93 persons, the most popular degrees being the A.M. (56 persons) and the M.S. (18 persons). These were also the most popular master's degrees in 1929-30.

Nine persons received other honorary degrees in 1931-32—5 the M.E., 2 the C.E., and 1 each the E.E. and the Ph.C.

FINANCES, GENERAL SUMMARY

Table 3, page 31, summarizes the receipts, expenditures, and value of property of the 1,460 institutions of higher education reporting for the year under review. This table is drawn up with special reference to the two groups of schools carried in previous reports; divisions are also made according to type of control and level of work done. The grand total of all institutions reporting is given in the last section of the table.

The table also presents a comparison between 1929-30 and 1931-32 for such of the financial details as are fairly comparable. Caution must be exercised in interpreting these comparisons, however, because the forms for collecting data were changed in certain particulars for 1931-32 from what was used 2 years earlier. There is, for example, no figure in the 1929-30 report to compare with the 1931-32 item of \$5,238,649 unitemized educational and general expenditures, neither is there in the 1931-32 set-up any item to compare with that of \$151,094,497 identified in 1929-30 as "other items, including unitemized totals."

Educational and general receipts for all institutions totaled \$451,996,833; receipts from auxiliary enterprises and activities, \$103,268,891; receipts for other noneducational purposes, \$10,997,781; those to be applied directly to extension of the physical plant, \$56,256,818; and those for additions to the permanent funds \$47,676,822.

Educational and general expenditures for all institutions reporting totaled \$420,632,553. Expenditures for auxiliary enterprises and activities totaled \$90,897,297, those for other noneducational purposes of a current character amounted to \$24,993,022, and capital outlays totaled \$98,388,697. This gives a grand total of \$634,911,569, which represents an increase of \$2,662,783, or 0.4 percent, over the corresponding total of \$632,248,786 for 1929-30. Let it be recalled that 46 more schools reported expenditures for 1931-32 than for 1929-30.

The total number of bound volumes in libraries of the various institutions in the country increased from 48,461,498 in 1930 to 52,919,063 in 1932. This is an increase of 4,457,565, or 9.2 percent.

The total value of all property held in 1932, including buildings, grounds, improvements, funds, and other assets, was \$3,824,982,967, which is an increase of \$387,865,050, or 11.3 percent, over the 1930 total. Details of this increase are shown in the following tabulation.

TABLE G.—VALUE OF PROPERTY HELD, ALL INSTITUTIONS, 1930 AND 1932

Item	1930	1932	Percent of Increase
1	2	3	4
Campuses, farms, buildings, and improvements.....	\$1,654,174,028	\$1,858,704,718	12.0
Equipment.....	270,921,232	348,400,859	28.7
Total physical property.....	1,925,095,260	2,207,294,577	14.7
Endowment (including student aid funds).....	1,372,068,474	1,463,407,130	6.7
Other assets.....	130,945,163	154,281,260	10.2
Grand total.....	3,427,117,917	3,824,982,967	11.3

In table 4, page 40, are presented percentage analyses of educational and general receipts, educational and general expenditures (so far as itemized), and property held by institutions of higher education. The analyses of expenditures and property are drawn up in two forms each so as to facilitate comparison between schools of different types of organization or control:

EDUCATIONAL AND GENERAL FUNDS

Receipts.—Total receipts for educational and general purposes were \$451,996,833. Of this amount \$409,217,928 went to universities, colleges, and professional schools and \$42,778,905 to teachers colleges and normal schools. Degree-granting universities, colleges, and professional schools received \$391,485,575, teachers colleges \$34,915,216, junior colleges \$17,732,353, and normal schools \$7,863,689. The total of educational and general receipts at publicly controlled institutions of all types was \$220,015,154; at all privately controlled institutions it was \$231,981,679. There is no figure in the 1929-30 reports which may be compared with the 1931-32 total here given; the total of \$483,065,219 for the earlier year includes more than 70 million dollars classified as miscellaneous receipts and probably includes some items which are itemized in the 1931-32 reports.

Student fees, including matriculation, tuition, laboratory, library, and incidental fees for directly educational purposes, and including those collected from both resident and nonresident students, totaled \$150,649,047. This is 4.5 percent greater than the corresponding receipts in 1929-30 and may be compared with the increase of 4.9 percent in resident college student enrollment already noted.

Student fees comprised one-third of the total educational and general receipts of all institutions. As might be expected, they ran much higher in privately controlled schools than in those under public control. The greatest extremes are to be found in the normal schools, where the percent among publicly controlled institutions is 4.4 and that among institutions under private control is 71.6.

Income from endowment amounted to \$60,902,567, which apparently represents a decrease of \$7,702,380, or 11.2 percent, from the amount reported for 1929-30. The earlier figure, however, included yield of student aid and annuity funds, which in 1931-32 were included under the heading "Other noneducational receipts." Endowment income accounted for 13.5 percent of the total educational and general receipts of all institutions reporting. As might be expected, it ran highest among privately controlled institutions, reaching 26 percent of the total among degree-granting privately controlled universities, colleges, and professional schools. It reached its lowest point among the publicly controlled teachers colleges, dropping to 0.1 percent; it amounted to only 1.1 percent of the total for all publicly controlled institutions above secondary grade.

Receipts from public sources for current expenses totaled \$174,663,239, which is approximately three-eighths of the total educational and general receipts and exceeds the 1929-30 report for this item by \$3,157,843, or 1.8 percent.

Receipts of this character ran highest among institutions under public control. It is noteworthy that they reached 4 percent of the total among privately controlled institutions in 1931-32, when they amounted to \$9,197,526 and exceeded by \$865,233, or 10.4 percent, the amount reported in 1929-30. Contributions of this character frequently do not take the form of unconditional subsidies; they are often to be viewed in the light of payment for services rendered, such as tuitions held at the disposal of public authorities, etc. In one institution, for example, the public grant is small and is conditioned on the opening of the college library to the residents of the local community.

Private gifts for current expenses amounted to \$29,947,529, of which \$27,064,506, or more than 90 percent, was reported by institutions under private control. This item amounted to 1.3 percent of the total educational and general receipts of publicly controlled institutions; among those under private control it came to 11.7 percent; and among all institutions reporting it was 6.6 percent. It exceeded the 1929-30 figure of \$26,172,312 by \$3,775,217, or 14.4 percent.

This increase, however, is more than offset by the inclusion in 1931-32 of more than 5 million dollars' worth of donated service, an item not previously carried in reports of this Office. The greater part of this item is, of course, reported by institutions under private control. The contributed administrative, teaching, and other service of the various religious bodies has long been recognized as an important factor in some institutions. It is also interesting to note that some publicly controlled institutions recognize this form of contribution and report nearly a quarter of a million dollars' valuation for it.

Doctors and dentists serving as faculty members without pay are illustrations of this practice.

Details of the number of schools reporting this item and the amounts reported by them appear in the accompanying table:

TABLE H.—ESTIMATED VALUE OF NONSALARIED PERSONAL SERVICE RENDERED, 1931-32

Item	Publicly controlled institutions		Privately controlled institutions		All institutions reporting	
	Number	Amount	Number	Amount	Number	Amount
1	2	3	4	5	6	7
A. Universities, colleges, and professional schools:						
1. Degree-granting.....	4	\$235,750	104	\$4,466,382	108	\$4,702,132
2. Junior colleges.....	2	5,800	26	319,323	28	325,123
Total.....	6	241,550	130	4,785,705	136	5,027,255
B. Teachers colleges and normal schools:						
1. Teachers colleges.....	1	1,800			1	1,800
2. Normal schools.....			4	73,850	4	73,850
Total.....	1	1,800	4	73,850	5	75,650
C. All institutions reporting:						
1. Degree-granting.....	5	237,550	104	4,466,382	109	4,703,932
2. Non-degree-granting.....	2	5,800	30	393,173	32	398,973
Total.....	7	243,350	134	4,859,555	141	5,102,905

Sales and services of educational departments, including hospital service and charges therefor, sales of products of farms operated primarily for instructional or research purposes, library fines, registrars' fees for transcripts of credits, collections of employment bureaus, charges for chemical or other analyses made by university staff or students for outside persons, and the like amounted to \$21,008,513, or 4.7 percent of the total educational and general receipts.

Other receipts, such as interest on current funds (daily balances, etc.), rentals of property not held as part of the university dormitory system or through the endowment fund (such as rentals of college auditoriums or gymnasiums for noncollegiate meetings of one sort or another, rental of houses occupying sites planned for future buildings, etc.), money borrowed for current expenses, and other items not easily susceptible of classification, accounted for \$14,825,938, or 3.3 percent of the total.

Comparison may now be made between publicly and privately controlled institutions with respect to sources of current educational and general income. Among the publicly controlled institutions as a whole public appropriations and tax levies account for 75.2 percent, student fees for 15.7 percent, and sales and services of educational

departments for 5.5 percent. Current private benefactions (private gifts for current expenses) and earnings of former benefactions (income from endowment) together yield less than one-fortieth of the total.

Among the privately controlled institutions the three most important sources of income are student fees, 50.1 percent; income from endowment, 25.2 percent; and private gifts for current expenses, 11.7 percent, the three coming to 87 percent, or approximately seven-eighths of the total.

Expenditures.—Educational and general expenditures for all the 1,357 institutions reporting totaled \$420,632,553, of which \$380,568,284 was expended by universities, colleges, and professional schools and \$40,064,269 by teachers colleges and normal schools. Of the total amount \$205,863,802, or 48.9 percent, was expended by the 500 institutions under public control and \$214,768,751, or 51.9 percent, by the 857 under private control.

Of the total amount of expenditures just mentioned, \$415,393,904 was itemized by function, the account headings being quite similar to those used in the 1929-30 report. Since the set-up for the earlier year did not include expenditures for extension among educational and general expenditures, but that for 1931-32 did include it, the percentage analysis of these expenditures for 1931-32 cannot be compared with a similar percentage analysis for 1929-30.

In reporting to this Office, the institutions were asked to prorate salaries and other items for employees whose time was divided among two or more functions. Provision was also made for estimating the value of nonsalaried personal service. In this way a more complete and reliable picture is provided than in former biennial reports.

Administration and general control cost \$47,231,796, representing 11.4 percent of the total itemized educational and general expenditures.

Beginning with 1931-32 the resident instruction account is divided into two parts: (1) Colleges, schools, and departments, and (2) related activities. The first part includes salaries of professors, instructors, and other persons charged with direct instruction on the campus, as well as other expenses connected with direct classroom, laboratory, or seminar instruction. The second part includes expenses of conducting activities which are aids to instruction and research, but which render service also to the general public. Examples of this are hospitals operated in connection with medical schools, dental or legal clinics, agricultural school creameries, university museums, etc.

The item of colleges, schools, and departments entailed an expenditure of \$232,645,009, or 56 percent of the educational and general total. That of related activities came to \$21,297,061, or 5.1 percent of the total. If the two are added together and considered as instruction cost, the total is \$253,942,070, or 61.1 percent of the total.

Organized research expenditures amounted to \$21,977,741, or 5.3 percent of the total. A little more than two-thirds of this expenditure is reported by the institutions under public control, where a large amount of research is carried on in agricultural experiment stations.

The cost of conducting the libraries was \$11,379,044, which includes salaries of library staff, and current expenditures of various sorts, except that new books and other permanent equipment for libraries are not included unless these articles are considered replacements.

This item is greater by \$1,757,486, or 18.3 percent, than the corresponding item for 1929-30, when \$9,621,558 was reported. In 1931-32 it came to 2.7 percent of the total of all educational and general expenditures. Libraries claimed a larger share of the total expenditures in privately controlled than in publicly controlled institutions.

Operation and maintenance of the physical plant cost \$56,796,812, which was 13.7 percent of the total of all educational and general expenditures. This was a decrease of \$3,625,370, or 6 percent, from the 1929-30 report.

Extension cost \$24,066,441, or 5.8 percent of the itemized total. Since this includes not only general extension and correspondence instruction, but also agriculture and home economics extension work, which is an important item in the publicly controlled institutions, it runs to a much higher percent of the total among publicly controlled degree-granting institutions than elsewhere. Here it reaches 12.8 percent, or a little more than one-eighth of the itemized total. Among privately controlled degree-granting institutions it reaches 1.7 percent and among publicly controlled teachers colleges it comes to 1.6 percent.

AUXILIARY ENTERPRISES AND ACTIVITIES

In the evolution of the present-day institution of higher education there have developed certain activities which, while not strictly educational in their character, are widely recognized as legitimate functions of an educational institution. Prominent among these are the provision of food and shelter for students, the recreational- and health-service program, the operation of student bookstores, social organizations intended to appeal to the entire student body, and the like. These are listed in the present report under the heading of auxiliary enterprises and activities.

The operation of dormitories and dining halls involved the collection of \$64,198,692 and the expenditure of \$47,819,768. It appears from a scrutiny of reports of some institutions that this difference is partially a matter of bookkeeping whereby all the income for the dormitories and dining halls is credited to that account, but some of

the expenses of operation and maintenance are included in the general operation and maintenance accounts of the institution. In some other schools the differentiation between tuition and boarding rates is not clearly reflected in the financial records and reports.

The athletic program involved total receipts of \$15,050,335 and total expenditures of \$15,266,162 during the year under review.

Other activities, including student health service, operation of college bookstores, student unions, Young Men's and Young Women's Christian Associations, college print shops, and the like, showed receipts of \$24,019,864 and expenditures of \$27,811,367.

The total of all receipts for auxiliary enterprises and activities came to \$103,268,891; the total of all expenditures \$90,897,297. There are no corresponding figures for 1929-30 from which comparisons may be drawn.

OTHER NONEDUCATIONAL TRANSACTIONS

Receipts for other noneducational purposes totaled \$10,997,781. These included income from investments held as endowment of scholarships, fellowships, or prizes, earnings of funds held under annuity agreements, money received to be awarded directly as scholarships, fellowships, or prizes, and similar collections.

Expenditures under this heading totaled \$24,993,022. These included payment of annuities, interest on indebtedness, repayment of money borrowed prior to 1931-32, payment of expenses incident to the conducting of financial campaigns, and amounts granted to students in the shape of scholarships, fellowships, etc., which do not involve repayment or the rendering of service to the institution concerned. The fact that money borrowed is listed in this report under educational and general receipts, whereas its repayment falls under noneducational transactions explains part of the great disparity between receipts and expenditures for other noneducational purposes.

PLANT FUNDS

Institutions of higher education received a total of \$56,256,818 which was specially designated for expansion of their physical properties. The total expenditures for this purpose were \$98,388,697, showing that large funds were used for plant extension which were not earmarked for that purpose.

The total expenditure for capital outlay is less by \$26,717,711, or 21.4 percent, than the corresponding expenditure for 1929-30.

CAPITAL FUNDS

Receipts intended for increase of the permanent funds (endowment, student aid funds, etc.) amounted to \$47,676,822, which is less by \$15,835,386, or 24.9 percent, than in 1929-30.

BENEFACTIONS OF \$100,000 OR MORE

During the year under review 105 institutions received benefactions totaling \$100,000 or more. These institutions were scattered over 35 States. This compares with 161 institutions in 40 States, which reported total benefactions of this magnitude in 1929-30.

PROPERTY

Nearly 53 million bound volumes are reported in the libraries of higher educational institutions. These figures do not include unbound pamphlets and papers not preserved in permanent form. Over 50 million volumes are at degree-granting institutions. Of the total number 35.3 percent are available at publicly controlled institutions and 64.7 percent are at institutions under private control.

Campuses and farms held for instructional purposes in 1932 were valued at \$331,293,862; buildings and improvements at \$1,527,500,856; and equipment (including library books, scientific and other instructional apparatus, furniture and fixtures, etc.) at \$348,499,859. This makes a total of \$2,207,294,577 invested in physical property.

The campuses and farms item amounts to 15 percent of the total of all physical property and varies widely among the different types of schools. In the privately controlled teachers colleges and publicly controlled normal schools it stands at 6.9 percent, but it goes to 22.2 percent among privately controlled junior colleges and to 24.7 percent among privately controlled normal schools. With the single exception of the teachers colleges, it runs higher among privately controlled schools than among those under public control.

Endowment funds, exclusive of student-aid funds and those held subject to annuity, totaled \$1,372,348,965, or 35.9 percent of the total of all property reported. Among the privately controlled institutions the percent ran nearly four times as high as it did among those under public control.

Among privately controlled degree-granting universities, colleges, and professional schools the amount of endowment held is a little greater than the total investment in physical properties, the percent of the total being slightly more than 46.1 for each item.

Student-aid funds amounted to \$91,058,165, or 2.4 percent of the grand total. They ran consistently higher among privately controlled schools than in those under public control. They ran proportionately much lower in the teacher-training schools than in the university, college, and professional school group.

Other assets amounted to \$154,281,260, or 4 percent of the grand total. This item includes annuity funds, funds whose final disposition was still undecided upon at the time of making the report, office, dining room, or other supplies on hand, and minor items not easily classifiable.

¹ Not tabulated by sex.

² Collegiate, professional, and graduate departments.

³ Not tabulated separately.

⁴ Includes 982 men and 1,239 women teaching in other departments.

⁵ Includes 27 men and 89 women teaching in other departments.

⁶ These figures not comparable with those of former years. "Collegiate" in 1932 figures means only colleges of arts and sciences, whereas formerly the term included engineering, education, commerce, etc., limiting "professional" in former years to theology, law, medicine, pharmacy, osteopathy, and veterinary medicine.

⁷ Includes graduate students in both academic and professional departments.

⁸ See table B for types of professional work included.

⁹ Undergraduate enrollments only.

¹⁰ Includes 27,533 men and 38,326 women in other departments.

¹¹ Includes 16,399 men and 22,754 women in other departments.

¹² Includes 15,923 men and 14,225 women in other departments.

¹³ Not including subcollegiate students.

¹⁴ Baccalaureate and first professional degrees.

¹⁵ Included with baccalaureate and graduate degrees.

¹⁶ Includes advanced professional degrees.

¹⁷ Data not requested for this year.

¹⁸ Entire instructional staff, September to June.

¹⁹ Entire instructional staff, summer session, 1931.

²⁰ Data not available in tabular form.

²¹ Includes receipts from other than public funds for increase of plant.

²² Expenditure figures used for city normal schools.

¹ Negro.

² Figures duplicated under University of Georgia.

³ Of this total, \$182,641 was assigned for plant extension.

⁴ In addition to above amount.

⁵ Includes College of Pharmacy, Detroit Teachers College, and College of City of Detroit.

⁶ Received from State appropriation at close of fiscal year.

⁷ Figures for 1929-30.

⁸ Year ends Dec. 31, 1931.

⁹ Report does not include University Medical School and University Hospital.

¹⁰ Included in column 9.

¹¹ Includes room and board.

¹² Dental school.

¹³ Federal funds.

¹⁴ See Morehouse and Spelman.

¹⁵ Figures refer to the central corporation of St. Louis University and exclude those of the corporate and affiliated institutions.

¹⁶ Teachers College and Woman's College of the University not included.

¹⁷ None available during 1931-32.

¹⁸ 18 institutions.

¹⁹ 14 institutions.

²⁰ All for student aid fund.

²¹ Including other than local public sources for tuition.

²² Including high-school funds.

²³ Incomplete data.

²⁴ Included in column 2.

WISCONSIN

- ¹ Negro.
- ² Data not available.
- ³ Includes Georgia State College of Agriculture and the Mechanic Arts.
- ⁴ Included in report for University of Georgia.
- ⁵ Includes \$152,142 expended for departmental equipment, new and replacements.
- ⁶ Includes some capital expenditures.
- ⁷ Detailed analysis of educational and general expenditures not available.
- ⁸ Included in next column.
- ⁹ Includes athletics.
- ¹⁰ Includes related activities, organized research, and extension.
- ¹¹ Included in resident instruction: Colleges, schools, and departments.
- ¹² Estimated from budget.
- ¹³ Statistics of calendar year 1931.
- ¹⁴ Includes dormitories and dining halls.
- ¹⁵ Included in physical plant operation and maintenance.
- ¹⁶ Statistics of 1930.
- ¹⁷ Includes administration and general control.
- ¹⁸ Includes preceding column.
- ¹⁹ Includes extension and some charges for administration and general control.
- ²⁰ Includes libraries.
- ²¹ Estimated.
- ²² Includes research.
- ²³ Included with administration.
- ²⁴ Includes extension.
- ²⁵ Formerly Mount St. Charles College.
- ²⁶ Report for 10-month period ending June 30, 1932.
- ²⁷ Includes related activities.
- ²⁸ Includes Union College, Albany Law School, and Albany Medical College.
- ²⁹ Report for 8-month period ending Apr. 30, 1932.
- ³⁰ 18 institutions.
- ³¹ Includes \$24,404 unitemized educational and general.
- ³² 14 institutions.
- ³³ Includes \$36,146 unitemized educational and general.

PART V.—LAND-GRANT COLLEGES AND UNIVERSITIES, YEAR ENDED JUNE 30, 1932

By WALTER J. GREENLEAF
Specialist in Higher Education

As indicated in the directory on page 371, the 69 land-grant colleges and universities are located in every State in the Union and in three Territories. Originally these institutions were known as "agricultural colleges", or "colleges of agriculture and mechanic arts", because by the act of 1862 the Federal Government granted them certain tracts of land for an endowment for the purpose of promoting "the liberal and practical education of the industrial classes". While these institutions teach such branches "as are related to agriculture and the mechanical arts" those subjects now represent only a portion of the curricula offered in them. At present, therefore, the term "land-grant colleges and universities" is superseding other terms. A number of institutions have recently dropped the word "agricultural" from their names retaining the title "State college" rather than "State agricultural college".

THE 69 LAND-GRANT COLLEGES AND UNIVERSITIES

[* Indicates a State university as well as land-grant college]

	Location	Name of Institution	President
1	Alabama, Auburn. *	Alabama Polytechnic Institute.....	Marion J. Funchess.

¹ The University of Georgia and all its branches constitutes the "University System of Georgia" Philip Weltner, chancellor, Atlanta, Ga.

There is no homogeneity in the group of 69 land-grant colleges. Twenty-three are State universities; 3—Cornell, Massachusetts Institute of Technology, and Rutgers—are essentially privately controlled institutions which have been designated by their respective States as land-grant institutions to receive Federal aid in certain departments; several of the Negro colleges are primarily normal schools or teachers colleges with small emphasis on agriculture and mechanic arts. Even if grouped in several different classifications, the institutions within a single group would not be comparable as to size, enrollment, endowment, or service. However, these institutions have one common factor—they are aided by the Federal Government to the extent of \$17,512,064 annually. Details of distribution are shown in table 30.

A condensed summary of data concerning these institutions is shown in table 24—Comparative Summary. In this summary the land-grant institutions are compared with 1,464 colleges and universities throughout the United States including outlying parts. It should be noted that the totals for all higher education in part V of this bulletin include institutions in outlying parts as well as for the continental United States. Totals in other parts of this bulletin are for continental United States only and exclude outlying parts. This procedure is necessary in comparing land-grant colleges and universities with all higher education, since three of the land-grant institutions are located outside of the continental United States, in Alaska, Hawaii, and Puerto Rico. Percentage figures for the 52 institutions for white students compared with 1,464 institutions are shown. That the group of land-grant institutions is outstanding in higher education is revealed by certain significant conclusions drawn from comparisons.

The land-grant institutions employ a fifth of all men and a tenth of all women who are resident teachers in higher education. Reduced to a full-time basis, they employ 26 percent of the men and 17 percent of the women faculty members in higher education. (Consult table 24, sec. I, column 4.)

Of all undergraduate and graduate students in college in the United States, the land-grant institutions enroll about 1 of every 5 men and 1 of every 8 women students. A substantial portion of students taking correspondence courses or extension classes are likewise enrolled in the land-grant institutions. While there are few secondary students in these institutions, most of the correspondence courses and extension classes below college grade are offered by the land-grant colleges. (Consult table 24, sec. II, column 4.)

The 52 institutions for white students specialize in certain curricula. If enrollments in the several specialties are limited to those in schools or colleges devoted to these specialties, the land-grant

colleges and universities enroll 97 percent of all agricultural students in the United States, 92 percent of all students in veterinary medicine, 91 percent of all students in architectural engineering, 85 percent of all women in home economics, 65 percent of all men in forestry, 55 percent of all mining engineering students, 54 percent of all civil engineering students, and nearly half of all other engineering students and journalism students. Likewise among the graduate students, 27 percent of all men and 19 percent of all women in graduate work are enrolled in the land-grant institutions. More than half of the graduate work in the fields of agriculture, engineering, fine arts, library science, medicine, pharmacy, and veterinary medicine, is offered in the land-grant institutions. (See table 24, sec. III, columns 2-13.)

First degrees awarded by the land-grant institutions and by others, hold in general the same ratio shown for enrollments. In the following fields more than half of the master's degrees granted in the United States in 1932 were awarded by land-grant colleges and universities—agriculture, architecture, engineering, home economics, library science, medicine, pharmacy, and veterinary medicine. With the addition of commerce and business, the same statement holds true for the awarding of doctor's degrees. (See table 24, section III, columns 14-22.)

The curricula elected by the students enrolled in land-grant institutions for the past 7 years are shown in a percentage analysis of enrollments and degrees in table 24, section IV. Each year for 7 years figures on enrollments and degrees have been received and tabulated independently. The fact that variations in percentage figures are small indicates a certain reliability of the data. By interpreting these data the following generalizations may be made: Agriculture, forestry, home economics, and architecture are holding their own with respect to enrollments, but fewer degrees are being awarded in agriculture. Veterinary medicine is being favored by more students; the percentage of enrollments has more than doubled in 7 years, and more degrees are being awarded. Arts and sciences continue to be popular with more than a third of land-grant students enrolled, and a definite increase in both enrollments and degrees in 1932. Commerce and business courses show a definite decrease in the past year over the preceding years with respect to both enrollments and degrees. Education courses continue to gain in both enrollments and degrees, in spite of the oversupply of teachers. Engineering as a whole fluctuates but little, but within the field, architectural, civil and electrical engineering have lost students while chemical engineering has gained. Definite declines are shown in fine arts, music, journalism, law, and dentistry. Pharmacy shows little change, but medicine continues to be increasingly popular as a profession.

For the first time information on the numbers of students preparing to teach is shown in detail for 52 land-grant institutions in table 27 and summarized in table 24, section 5, for land-grant institutions compared with 1,464 colleges and universities in the United States. Of the undergraduate students in the entire United States more than twice as many women as men are planning to enter the teaching profession. Among the graduate students, however, practically equal numbers of men and women are registered, both for the United States as a whole, and for the group of land-grant institutions. Larger numbers of students are in training to teach in the senior or regular high schools than for other types of schools. Considering the teaching of special subjects only, the larger numbers in the United States are in home economics, physical education and health, public-school music, and commerce and business; in the land-grant institutions the larger numbers are in home economics, agriculture, and physical education and health.

FINANCES

About one-fourth of all receipts for higher education in 1931-32 went to the 52 land-grant institutions for white students. The data show that these colleges and universities received 27 percent of all educational and general funds, 12 percent of dormitory and dining hall charges, 23 percent of all athletic receipts, 27 percent of receipts from student-health services, bookstores, and student unions, and 24 percent of all receipts for extension of physical plants. While tuition rates are low in these institutions, there are fees which students pay and the total of tuition and fees in the land-grant institutions amounts to more than \$19,000,000, or one-eighth of all such charges in the United States in 1931-32. Forty-nine percent of the receipts from all public sources—i.e., Federal Government, States, counties, and cities—went to the land-grant institutions—more than \$86,000,000. As for property, the land-grant institutions own 15 percent of all higher educational property in the United States, 17 percent of campus and farm investments, 19 percent of college buildings and improvements, 29 percent of college equipment, but smaller proportions of endowment and student aid funds.

For individual land-grant colleges and universities, detailed statistics are shown in tables 25 to 30, inclusive, for staff members, student enrollments, students preparing to teach, Morrill-Nelson funds, 1862 land-grant funds, and Federal funds summarized. For further institutional details consult part IV of this volume, where land-grant colleges and universities are included generally with the publicly controlled institutions except three—Cornell, Rutgers, and Massachusetts Institute of Technology—which are included with the privately controlled institutions.

Student enrollment in the land-grant institutions is seldom a definite figure since there are so great a number and variety of activities. When a single figure is given it generally refers to students who are in resident work on the campus, and excludes all other students that the institutions serve—for instance, correspondence students, extension students, secondary pupils, short-course students, and those attending other farmers' institutes. In the 52 land-grant institutions for white students, the resident enrollment including undergraduates, specials, and graduate students for 1931-32 was 128,343 men and 56,011 women. How these students were distributed among the institutions is shown in table 26, columns 7 and 8. Land-grant institutions with more than 10,000 students are: University of California at Berkeley and Los Angeles, 20,361 students; University of Minnesota, 13,997; University of Illinois, 12,814; and Ohio State University, 12,025. The median size of the fall enrollment in 52 institutions was 2,094 with extremes from 126 students in Alaska to 18,342 in California.

MORRILL-NELSON APPROPRIATIONS

Each year since 1912 the Federal Government has appropriated \$50,000 to each State for the support of the land-grant colleges and universities. Forty-eight States and three territories now participate in the fund which totals \$2,550,000 annually. In general the fund must be used during the fiscal year for which it is appropriated, and disbursements are allowed in seven different fields for salaries and facilities. The distribution of expenditures among these seven fields is left to the institution, and considerable variation is shown for different colleges. (See table 28.) For the 52 land-grant institutions for white students, the percentages of the fund in the 7 fields of work are as follows:

Field of work	Percentage of fund expended
Agriculture.....	18
Engineering and mechanic arts.....	29
English language.....	11
Mathematical science.....	8
Natural and physical science.....	27
Economic science.....	6
Teacher preparation in agriculture, etc.....	1

APPORTIONMENT OF MORRILL-NELSON APPROPRIATIONS TO
NEGRO LAND-GRANT COLLEGES

Seventeen States maintain separate land-grant institutions for white and Negro students. Morrill-Nelson funds are required to be divided between these institutions in each State on an equitable basis, usually according to a census classification. Amounts received by the several institutions are detailed in table 28. The basis for division of the Morrill-Nelson funds in the different States is as follows:

ALABAMA—Division is "based from year to year upon the ratio of the number of each race of legal school age to the population of school age in the State."

ARKANSAS—Division is eight-elevenths to the University of Arkansas, and three-elevenths to the Negro college at Pine Bluff.

DELAWARE—By joint resolution of the legislature (1891) "the State treasurer is directed and required to pay annually to the trustees of the State College for Colored Students—20 percent, one-fifth part of the sum * * *."

FLORIDA—The funds are equally divided between the white and Negro land-grant colleges.

GEORGIA—By joint resolution (1890) "one-third of said fund shall be for the colored students, and two-thirds for the whites * * *"

KENTUCKY—The fund is divided on a basis of the "ratio which the school census of colored children taken in the State bears to the school census in both races." Since 1893 the ratio has been 14.5 percent to 85.5 percent.

LOUISIANA—Division is on a basis of the State census of educable children between 6 and 18 years of age.

MARYLAND—Division is on a basis of total population census.

MISSISSIPPI—The legislature provided (1892) that the funds be divided between the land-grant colleges for white and colored students in the proportion that the whole number of educable children in the State of each race bears to the whole number of educable children of both races.

MISSOURI—In 1891 the division was fixed at one-sixteenth for the benefit of Lincoln University (Negro) and fifteen-sixteenths for the State university including the school of mines.

NORTH CAROLINA—By implication the provisions of the Morrill Act were accepted and approved by the legislature in 1891, and divided "into the exact ratio in this State of the white population to the colored, and this provision to apply to the current and all succeeding appropriations."

OKLAHOMA—By an act March 10, 1899, Oklahoma divided the fund so that the Negro college receives one-tenth of the appropriation.

SOUTH CAROLINA—In 1890 the legislature provided that the fund—shall be equally divided between the land-grant institutions for white and for Negro students.

TENNESSEE—On a basis of scholastic population the Negro land-grant college receives six twenty-fifths, or 24 percent of the fund.

TEXAS—By act of 1890 Texas apportioned three-fourths of the fund to the institution for white students, and one-fourth to the Negro land-grant college.

VIRGINIA—The legislature has apportioned one-third of the fund to the Negro land-grant college, and two-thirds to the institution for white students.

WEST VIRGINIA—By provision of legislature, the Negro land-grant college has received \$10,000 annually from Morrill-Nelson appropriations since 1912 (20 percent).

Proportion of appropriation received by Negro land-grant colleges in 1931-32.

LAND-GRANT FUNDS OF 1862

The Federal land-grant funds of 1862 are in the nature of endowment funds and not direct annual appropriations. These funds are invested by the several land-grant institutions in safe securities which yield reasonable rates of interest. Until April 13, 1926, these funds were required to earn 5 percent interest but on that date the act was amended to read—that "Such funds shall yield a fair and reasonable rate of return, to be fixed by the State legislatures, and that the principal thereof shall forever remain unimpaired." These funds which are detailed for each land-grant institution in table 29 total \$22,496,957 and in 1931-32 yielded a return of \$1,021,621 on invested funds, and \$68,711 from rentals, deferred payments, etc. Nine-tenths of this income is expended for teachers' salaries.

In addition to these Federal appropriations and endowments, there are other Federal funds which are received by the land-grant institutions. These funds include land-grant funds other than 1862 funds, Hatch-Adams funds, Smith-Lever funds, Smith-Hughes funds, Clarke-McNary funds, Purnell funds, Capper-Ketcham funds, and additional cooperative extension funds. The grand total of all Federal money received by the land-grant institutions in 1931-32 was \$17,512,064. The 17 Negro land-grant colleges received \$354,716.

Capital outlay, for increase of physical plant:					
Buildings and grounds	83,413,019	16,558,794	19.8	426,805	16,985,599
Equipment—apparatus, books, furniture, etc.	15,620,941	4,622,328	29.7	127,292	4,749,620
Total for capital outlay	99,033,960	21,181,122	21.4	554,157	21,739,719
Property values:					
Land and buildings:					
Campus and farms	317,327,701	55,119,696	17.4	1,442,579	56,562,275
Buildings and improvements	1,372,882,578	261,950,412	19.1	10,841,170	272,791,582
Equipment: Library books, museum collections, scientific apparatus, livestock, furniture, etc.	321,288,607	92,990,621	28.9	1,982,010	94,972,631
Funds:					
Endowment, general and restricted	1,366,855,392	111,678,309	8.2	173,000	111,851,309
Student aid, scholarships and loans	90,860,284	13,412,420	14.8	1,000	13,413,420
Other assets, annuity and waiting-disposition	163,016,292	13,650,478	8.9	9,067	13,659,545
Total value of all property owned	3,620,950,164	648,801,336	15.2	14,448,866	663,250,202
Number of bound volumes in libraries	48,799,556	9,580,316	19.6	146,274	9,725,590

1 This total includes 4 institutions located in outlying parts of the United States.

2 Men.

3 Women.

4 Some women detailed in column 9 (men), i.e., University of Illinois reported 321 women, and Ohio State University reported 464 women which are included in the totals for men. The number of individual women, however, was available (5,247); and individual men 13,119 graduate students from another item.

5 Does not include duplicates.

6 Includes women in footnote 4 who are included with men in column 9.

7 Base equals 100 percent—students in 52 land-grant institutions.

8 No students reported in teacher preparation by University of Illinois, Iowa State College, or Massachusetts Institute of Technology.
